Summary

Computer Science Engineering student with an 8.63 CGPA and a Minor in Artificial Intelligence from IIT Ropar. Experienced in developing Python-based automation solutions using Flask, Tkinter, and REST APIs during a Boeing internship. Strong academic foundation in Machine Learning, Deep Learning, NLP, and AI through specialized coursework and projects. Seeking opportunities in Software Engineering, AI/ML, or Data Science.

Education

B.E. in Computer Science Engineering **Expected 2027**
GSSSIETW CGPA: 8.63/10

Minor in Artificial Intelligence 2025–2026
Indian Institute of Technology (IIT) Ropar with Masai School

Experience

Boeing India Private Limited Jul 2026 – Sep 2026
Programmer Analyst Intern — ITAR Application Compliance Team *On-site*

- **Developed two Python-based automation POCs** for enterprise ITAR compliance assessment and Azure DevOps board-health analysis.
- **Built an ITAR compliance automation tool** to evaluate surveys, track application compliance, automate communication, and maintain audit logs across **800+ applications**.
- **Developed an Azure DevOps Board Health Dashboard** using Python, Flask, and REST APIs to analyze **1,000+ work items** across five health rules.
- **Reduced compliance processing time from 45–60 minutes to under 2 minutes** and Azure DevOps auditing from hours to approximately 30 seconds through automation.

Skills

Languages: Python, Java, SQL, HTML
AI/ML: Machine Learning, Deep Learning, Neural Networks
Libraries Pandas, NumPy, Matplotlib, Scikit-learn, Flask, Streamlit
Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, MySQL, Microsoft Excel, Kiro, Azure DevOps
Core Fundamentals: Object-Oriented Programming, Operating Systems, Database Management Systems

Projects

Speech Detection and Classification System using Deep Neural Networks
Python, TensorFlow/Keras, Librosa, MFCC, SpeechRecognition, Deep Learning

- Developed an **AI-powered real-time assistive system** for detecting speech disfluencies including **repetitions, prolongations, and blocks** using a hybrid deep-learning and rule-based approach.
- Built an audio-processing pipeline using **Librosa and MFCC feature extraction** with a **TensorFlow/Keras-based deep-learning model** for speech classification, trained using publicly available datasets including **UCLASS** and a clinically assessed database developed with **AIISH, Mysuru**.
- Combined the trained model's predictions with **speech-to-text analysis and rule-based logic** to identify and classify disfluency patterns in the transcribed speech, including repetitions and prolongations.
- Designed the system for **real-time speech processing and corrected speech output**, integrating audio classification, speech recognition, and post-processing into a single assistive pipeline.

Customer Feedback Analytics Platform using NLP and Machine Learning
Python, Scikit-learn, Pandas, NumPy, TF-IDF, Random Forest, Streamlit

- Processed over **568,000 Amazon Fine Food Reviews** using NLP preprocessing and **TF-IDF feature extraction**, training a Random Forest classifier that achieved **86.62% test accuracy**.
- Developed an interactive **Streamlit dashboard** for sentiment prediction and visualization, enabling end-to-end analysis of customer feedback.

Involvements

- **Student Placement Coordinator** *2024–Present*
  Managed recruitment databases and coordinated campus placement drives.
- **Miss G (College Pageant)** – 2nd Runner-up *2025*
  Recognized for leadership, confidence, and public speaking.
- **Treasurer, Science & Adventure Club** *2023–2024*
  Managed club budgets and organized technical and student engagement events.
- **KV National Level Hockey Player** *2019*
  Represented KVS Bangalore Region at the KVS National Meet.
